

# Welcome to the SDSC Summer Institute 2026

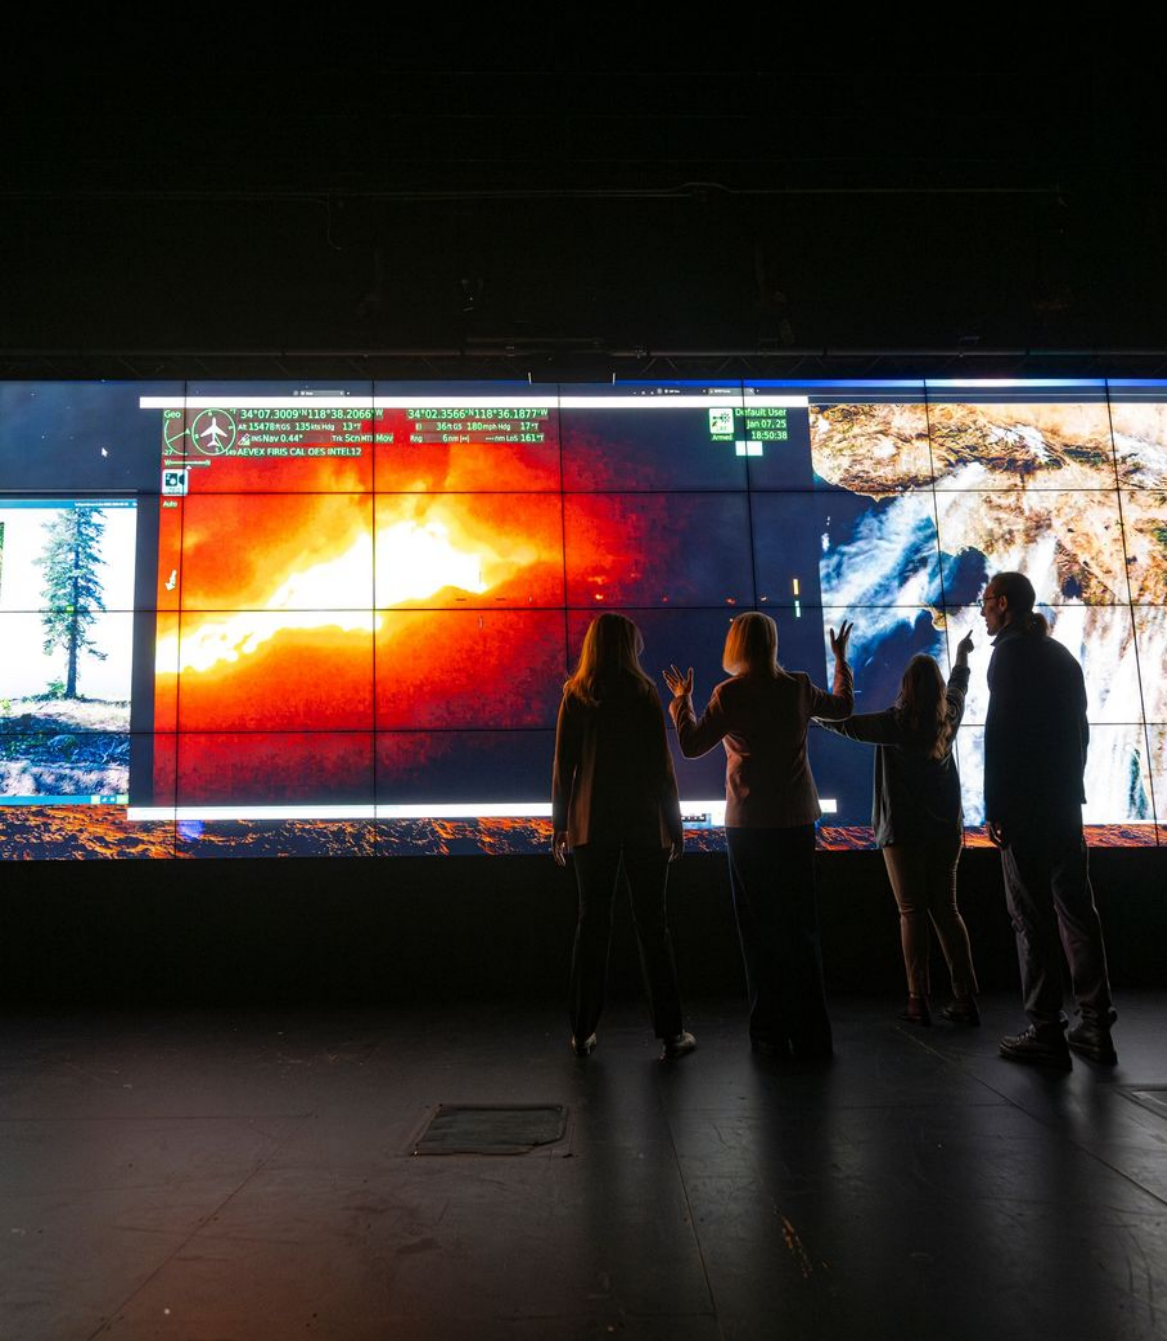

HPC & Data Science Summer Institute 2026

Andrea Zonca, Summer Institute Chair | July 23, 2026

**SAN DIEGO  
SUPERCOMPUTER  
CENTER**

**UC San Diego**

HALICIOĞLU SCHOOL OF DATA SCIENCE  
AND COMPUTING

**Build skills. Apply them.  
Find your people.**

**PRACTICAL**

Run real scientific work on Expanse.

**TRANSFERABLE**

Build workflows and habits you can take home.

**CONNECTED**

Meet instructors and peers working on related science.

# Find your scientific community

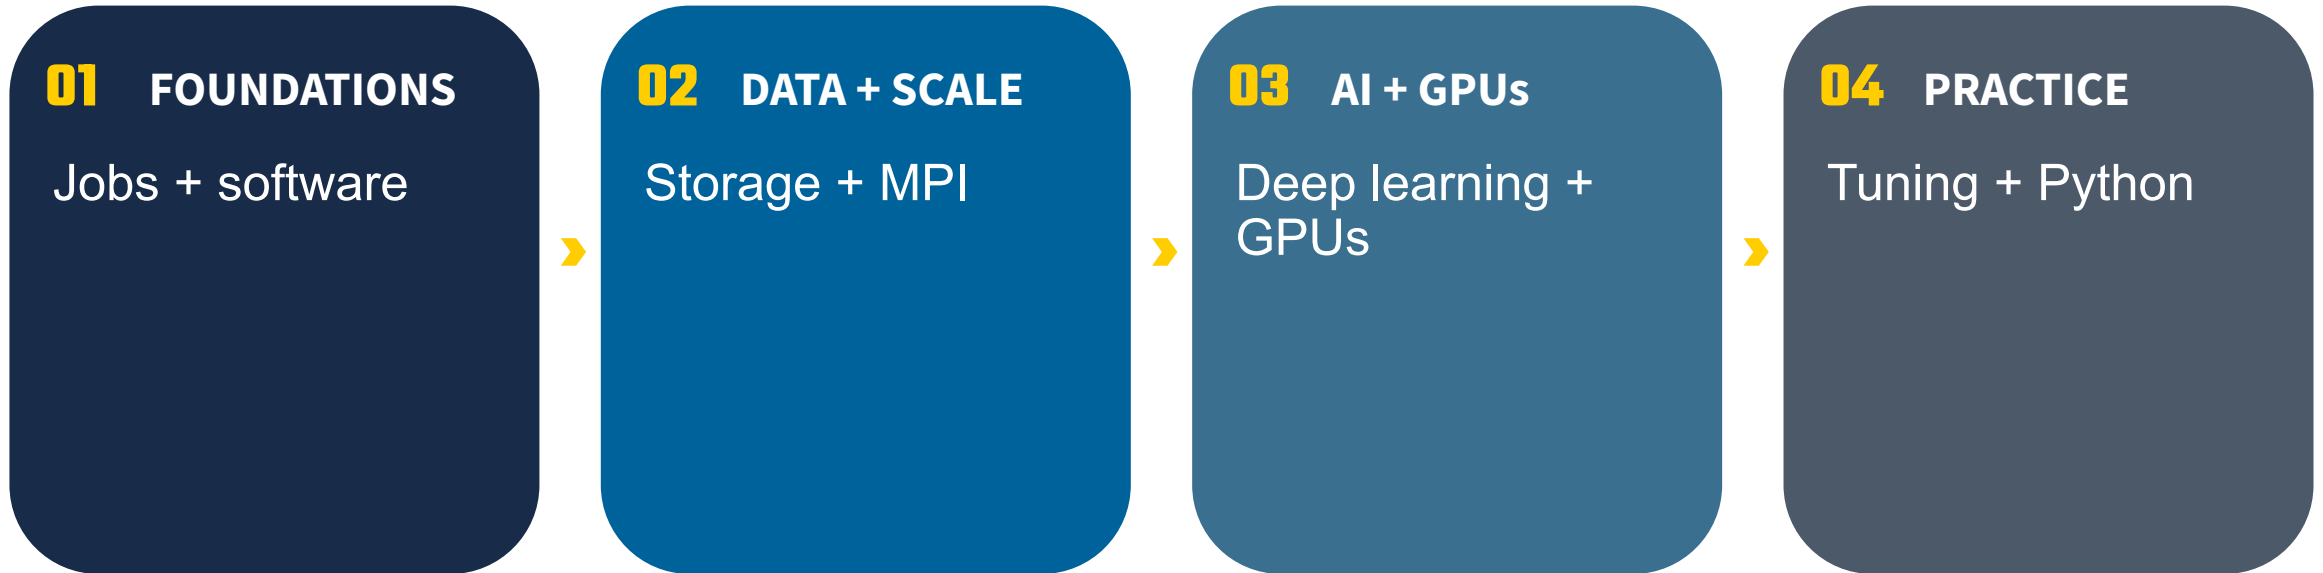

**Reply in the introduction thread in the main SI26 Slack channel**

- 1** Name + institution
- 2** Scientific domain or research area
- 3** What you want to accomplish with HPC
- 4** One topic you want to discuss with others

**Post once. Browse later. Meet at least two people.**

# Your learning journey

The sessions build from foundations to independent, scalable scientific work.

**By Friday: choose resources, build workflows, diagnose problems, and know where to get help.**

# Your instructor community

Bring your research questions. These are the people to find during the week.

**Andrea Zonca**

Python + program

**Igor Sfiligoi**

Parallelism + tuning

**Mary Thomas**

Jobs + workflows

**Marty Kandes**

Data systems

**Nicole Wolter**

Getting help

**Andreas Goetz**

GPU computing

**Mai Nguyen**

Deep learning

**Paul Rodriguez**

Deep learning

**Fernando Garzon**

Scientific practices

**Subhasis Dasgupta**

Knowledge  
management

Also teaching: Yuwu Chen, Andy Liang, and Mahidhar Tatineni

# Learning continues between sessions

## COFFEE BREAKS

Ask the quick technical question.

## LUNCH

Compare research workflows and tools.

## MONDAY RECEPTION

Have the deeper science conversation.

## ALL WEEK

Follow up in Slack and stay connected.

**Start with instructors. Then find peers  
working on related or complementary problems.**

# How to get the most from the week

## DO THE HANDS-ON WORK

Try, fail, debug, learn.

## ASK EARLY

Raise issues while we can help.

## HELP SET THE PACE

Tell us when the pace is unclear.

## USE THE SHARED SPACES

GitHub for materials. Slack for people.

**Questions and troubleshooting are part of the curriculum.**

# Today: get ready to learn

- 9:00** **Welcome + orientation**  
Andrea Zonca
- 9:15** **Logistics - things to know**  
Susan Rathbun
- 9:30** **Accounts, login + first Expanse work**  
Nicole Wolter

**Next: Susan Rathbun**

Logistics - Things to Know
